PROFILE

Fresh Graduate in Information Systems with experience in Data Analytics and Business Intelligence, with a strong focus on data analysis, business performance analysis, and translating data into actionable insights. Experienced in performing exploratory and ad-hoc analysis on large-scale marketplace, transaction, customer, and traffic datasets using SQL and BigQuery to identify trends, evaluate performance, and support data-driven decision making. Experienced in developing data marts, dashboards, and analytical reports using SQL, BigQuery, Excel, Python, Looker Studio, Tableau, Power BI, and Superset, as well as supporting pricing analysis in a fintech environment. Eager to apply analytical and problem-solving skills to uncover business opportunities, support strategic decisions, and drive measurable business impact.

EDUCATION

Universitas Pembangunan Nasional 'Veteran' Jakarta — **Jakarta, Indonesia**

Bachelor Degree in Information System – GPA : 3.91/4.00 — *Aug 2022 – Sept 2026*

- Relevant courses : Data Mining and Data Warehouse, Data Engineering, Big Data, Database Systems, Communication Network and Big Data, Data Visualization, Statistic, Programming Basics.

EXPERIENCE

PT Global Digital Niaga Tbk (Blibli) — **Jakarta, Indonesia**

Business Intelligence Intern — *May 2026 - Present*

- Analyzed business data across 7+ marketplaces and commerce channels and 30+ brands, covering GMV, NMV, orders, AOV, traffic, conversion, advertising, affiliate, and livestream metrics to monitor performance and identify trends.
- Conducted ad-hoc analysis across marketplace and Live Studio, analyzing livestream, traffic, transaction, and advertising data and preparing stakeholder reports covering 20+ key metrics.
- Built and maintained 5+ Looker Studio dashboards to monitor marketplace and Live Studio performance and support data-driven decision-making.
- Utilized SQL and BigQuery to transform and aggregate data from 5+ data warehouse tables, developing 10+ data mart datasets for dashboard reporting, recurring analyses, and ad-hoc requests.
- Conducted marketplace and Live Studio analysis across TikTok and Shopee, covering Shop Tab, Search, Livestream, Short Video, and Affiliate, and prepared datasets and metrics to support A/B testing initiatives.

Amartha Financial — **Jakarta, Indonesia**

Growth Data Analyst - Payment Business Intern — *Feb 2026 - May 2026*

- Analyzed PPOB transaction data across 20+ product categories and 100K+ active agents, monitoring GMV, transaction volume, revenue, margin, product mix, and WoW growth to evaluate product performance and identify growth opportunities.
- Set and adjusted PPOB product pricing based on transaction trends, product performance, customer purchasing behavior, and margin considerations, supported by pricing analysis and ad-hoc reporting.
- Designed promotional scenarios and A/B testing frameworks based on transaction behavior, including customer segmentation, incentive thresholds, and scenario performance analysis to support promotional strategy evaluation.
- Built and maintained 10+ dashboards using Looker Studio, Superset, and Power BI to monitor payment business performance and support data-driven decision-making.
- Used SQL to extract, join, and transform data from multiple data warehouse tables for transaction analysis, pricing analysis, business reporting, and ad-hoc requests.

PT Adira Dinamika Multi Finance, Tbk. — **Jakarta, Indonesia**

IT Data Science Intern — *Apr 2025 - Sept 2025*

- Processed and validated 2M+ customer records through ETL workflows, ensuring high data accuracy and consistency for reporting and analytical use cases.
- Performed comprehensive data quality checks across ETL outputs, including completeness, duplication, and logical validation, to support reliable business reporting.
- Developed automated ETL and data processing workflows that reduced manual data preparation time by ~40%, improving efficiency for analysts and stakeholders.
- Prepared structured datasets and documentation to support standardized reporting, cross-team data usage, and downstream analytical processes.

PT Ivonesia Solusi Data (Ivosights) — **Jakarta, Indonesia**

Data Cleansing Analyst — *Feb 2025 - Mar 2025*

- Monitored and validated incoming social media and digital performance data for 40+ clients, ensuring reliable inputs for dashboards and reports.
- Processed and organized 10,000+ data points per week, improving data usability for sentiment analysis and performance monitoring.

- Analyzed engagement and sentiment trends to support brand performance evaluation and client reporting needs.
- Prepared daily and weekly performance reports that supported internal monitoring and client-facing dashboards.

Home Credit Indonesia Remote
Project-Based Virtual Intern : Data Scientist *Jan 2025 - Feb 2025*

- Conducted comprehensive exploratory data analysis (EDA) on a loan application dataset containing 307,511 records and 122 features to identify key patterns and risk indicators.
- Effectively handled missing data (69.87% of total), applied advanced encoding techniques for 10+ categorical features, and scaled numerical variables to ensure data readiness for analysis.
- Generated actionable insights for loan structuring optimization, with analysis indicating a potential default rate reduction of up to 15% based on identified risk segments and data-driven recommendations.

PROJECTS

Live Studio Performance Dashboard Blibli | Report *May 2026 – Sept 2026*

- Developed SQL-based data marts in BigQuery by integrating marketplace, product, advertising, and livestream data for weekly dashboard reporting across 10+ brands.
- Automated weekly data preparation and pipeline orchestration using SQL, BigQuery, and Apache Airflow to support recurring dashboard updates.
- Developed an interactive Looker Studio dashboard to analyze livestream playbook performance across GMV, items sold, host, and advertising metrics, supporting performance evaluation and business insights.
- Tech Stack: SQL, Google BigQuery, Apache Airflow, Looker Studio.

E-Commerce Data Quality Analysis | Report *Feb 2025 – Feb 2025*

- Identified and resolved key data quality issues in an e-commerce dataset, including incorrect data types, duplicates, and inconsistent formatting.
- Applied SQL-based data cleaning and transformation techniques, converting numerical fields, standardizing date formats, and ensuring accurate discount calculations.
- Optimized data integrity by removing redundant records and inconsistencies, improving overall data accuracy for analytical and reporting purposes.
- Tech Stack: Google BigQuery, Excel.

Customer Review Analysis of Ruangguru | Report | Dashboard *July 2024 – Aug 2024*

- Led the end-to-end data analysis process, including business understanding, data preprocessing, and exploratory data analysis (EDA) on 4,000+ customer reviews.
- Developed a comprehensive dashboard featuring 15+ interactive visualizations, enabling data-driven decision-making for product and customer experience improvements.
- Extracted critical insights from customer feedback, resulting in 7 actionable recommendations that contributed to enhancing user satisfaction and service optimization.
- Tech Stack: Google Colab, Python, Looker Studio, GitHub.

SKILLS

Programming Languages: Python, SQL, R.

Technical Skills: Business Intelligence, Data Analysis, Data Visualization, Descriptive Analysis, Data Warehouse, Dashboarding, Reporting, Data Preprocessing, Exploratory Data Analysis (EDA), Database Management, ETL/ELT Processes, Data Storytelling.

Tools: Google BigQuery, Looker Studio, Tableau, Power BI, Superset, Excel, Airflow, MySQL, Google Colab, Jupyter Notebook, Visual Studio Code, Power Automate, GitHub, Microsoft Office, Google Workspace.

Soft Skills: Analytical Thinking, Attention to Detail, Problem Solving, Collaboration, Time Management, Communication.

Spoken Languages: Indonesian (Native), English (Professional).

COURSES & CERTIFICATIONS

- Information Technology Specialist in Data Analytics, *Certiport*
- From Relational Model (SQL) to MongoDB's Document Model, *MongoDB*
- Building AI-Powered Search with MongoDB Vector Search, *MongoDB*
- Data Visualization in Tableau & Python, *Udemy*
- Fundamental Visualization with Python, *DQLab*
- Python Fundamental for Data Science, *DQLab*
- R Fundamental for Data Science, *DQLab*
- Introduction to Data Analysis using Microsoft Excel, *Coursera*
- SQL for Data Analysis, *MySkill*
- Data Science Fundamental, *MySkill*
- Intro to Data Analytics, *RevoU*
- Alibaba Big Data Basic Level, *Alibaba Cloud*
